I build scalable, high-performance applications across the full stack. Specializing in Angular, C#, Java, and modern cloud architectures, I've delivered enterprise solutions for telecommunications, finance, and retail at scale.

Seeking: Senior Software Engineer, Tech Lead, Solution Architect

EXPERIENCE

Senior Software Engineer

June 2023 – Present

Charter Communications

- Architected and launched multiple revenue-generating features across the full stack using Angular 22 and GraphQL
- Hardened enterprise data pipelines processing millions of daily transactions with improved reliability
- Led codebase modernization initiative improving developer velocity and maintainability

Angular 22 · GraphQL · TypeScript · Azure · CI/CD

Software Engineer

March 2021 – June 2023

Feature 23

- Built enterprise Angular/C#/Blazor application handling high-volume transactions for financial clearinghouse
- Developed government tax filing platform using Angular, C#, and SQL on Azure Government cloud
- Established comprehensive testing strategy with XUnit and Selenium

Angular · C# · Blazor · T-SQL · Azure

Software Engineer

August 2018 – March 2021

Walmart Labs

- Engineered Java/Spring microservices processing device telemetry data at retail scale
- Built dynamic financial management application in Angular 8 with fully configurable fields
- Achieved broad test coverage with JUnit, Serenity, and Karma

Java · Spring Boot · Angular 8 · Microservices

SKILLS

Frontend	Angular, React, TypeScript, JavaScript, HTML/CSS, RxJS, NgRx
Backend	C#, Java, Node.js, ASP.NET, Spring Boot, REST APIs, GraphQL
Database	T-SQL, SQL Server, PostgreSQL, Hibernate, Entity Framework
Cloud & DevOps	Azure, AWS, Docker, Kubernetes, CI/CD, Git, Jenkins
Testing	XUnit, JUnit, Karma, Jasmine, Selenium, Serenity
Architecture	Microservices, Event-Driven, Domain-Driven Design, SOLID, Design Patterns

EDUCATION

B.S. Mathematics — Western Washington University, 2016

SOA Exam P (2017) · SOA Exam FM (2018)
