Professional Summary

Results-driven Senior Software Engineer with 8+ years of full-stack experience building enterprise-grade applications across fintech, government, and telecom sectors. Proven track record delivering complex, high-traffic systems using C#, Java, Angular, React, and cloud platforms. Strong foundation in mathematics with actuarial exam credentials and a record of academic distinction.

Technical Skills

Frontend Languages: TypeScript, JavaScript

Backend Languages: C#, Java, C++, Kotlin, Python, Rust, SQL, Node.js

Frameworks: ASP.NET, Spring Boot, Spring MVC/Batch, Hibernate, Angular (incl. v22), React, Blazor, Meteor.js, Swift UI

APIs & Query: GraphQL, RESTful APIs

Testing: XUnit, JUnit, Selenium, Serenity, Karma

Cloud & DevOps: Azure Government, Microservices Architecture

Databases: T-SQL, SQL Server

Other: SOA Exam P (2017), SOA Exam FM (2018)

Professional Experience

Senior Software Engineer | Charter Communications, Denver, CO

June 2023 – Present

- Designed and launched multiple new revenue flows spanning the full stack, from UX entry points through pricing and payment exchange, leveraging GraphQL APIs and Angular 22 for the client-facing layer.
- Hardened and maintained enterprise-level data pipelines across multiple environments, improving reliability and reducing risk exposure; managed environment configuration through a parallel YAML-based repository system.
- Led a large-scale codebase modernization initiative leveraging a proprietary dynamic framework, improving maintainability and developer velocity.

Software Engineer | Feature 23, Denver, CO

March 2021 – June 2023

- Built an enterprise Angular/C#/Blazor/T-SQL application handling high-volume transaction flows for a major financial clearinghouse; implemented comprehensive XUnit and Selenium test coverage.
- Developed a tax filing application for a government entity using Angular, C#, and SQL deployed on Azure Government, ensuring compliance with security and regulatory standards.

Software Engineer | Walmart Labs, Bentonville, AR

August 2018 – March 2021

- Built microservices in Java/Spring (MVC, Boot, Batch) to process device telemetry data at scale; developed a parallel service suite in Node.js/Meteor.js and delivered the full React front-end.
- Engineered a dynamic financial management application in Angular 8 with fully configurable fields; implemented backend services in Java/Spring for data processing and dissemination; achieved broad test coverage with JUnit, Serenity, and Karma.

Education

B.S. Mathematics — Western Washington University, Bellingham, WA, 2016

Honors & Activities

- Phi Eta Sigma & Golden Key Honor Societies; WWU Putnam exam representative; 1st Place Knowledge Bowl State (2011).
